RE: Data Science Intern

I am writing to express my interest for the position of Data Science Intern with IBM as advertised on Dalhousie's MyCareer. I am pursuing 2nd year of my Bachelor of Computer Science degree at Dalhousie University. I am student with a curious mind, and I am confident that my in-dept knowledge of programming languages, databases, and professional skills that I have acquired through academic coursework, projects, and passion for developing high-quality solutions will make me an asset for this position. Working for your company is a great opportunity for me to learn and build my technical and professional skills.

I have been practicing programming languages like **Java, C, and Python** for more than 4 years. I have strong knowledge of object-oriented programming and data structures with java and have received A+ twice for the related courses at university. Additionally, I also have knowledge of **MySQL** and developing relational databases as have worked on a database project before as mentioned in my resume, working on these projects I gained some good knowledge of data analyzing and data modeling. I also have good knowledge of web technologies like **HTML, CSS, JavaScript** and **JSON** and I have built a dynamic university time-table website as a project for one of the courses I took at university. Not only technical skills, but I have also developed communication, organization and designing skills while I worked with Dalhousie university's google student developer club as a graphics designer, I worked with the team of 10 students where we discussed and created graphic designs individually for the events and seminar. Furthermore, I am willing to learn new technologies that will allow me to widen my technical horizons and contribute to your organization.

I am excited to contribute my technical abilities and support towards your team to help your company achieve its goals. Please review my resume for a more in-depth illustration of work history and accomplishments. I would be pleased to meet with you for an interview to discuss the position and my qualifications further.

Thank you for your time and consideration,

Warm Regards,
Mansi Patel.
