Dear Ms. Lois Whitehead,

I am writing to express my interest for the position of **Developer** intern at Science Atlantic. I am **an international student** (currently on co-op work term) pursuing 2nd year of bachelor's degree in Computer Science at Dalhousie University. I am a self-motivated individual with a cheerful attitude, and I am confident that my experience with working on web-development projects and tools will make me an asset for this position. Moreover, working with Science Atlantic is a great opportunity for me to learn and build professional skills.

I have a keen interest in web-development and user experience and user interface. In fact, for one of my projects in university I created a dummy university timetable website using **Java, CSS, HTML 5, and JSON**. On the website the person can navigate through different courses, add, or drop classes, and view other course related information. Additionally, I have experience working with data analytics solutions as during my last co-op and that's where I developed **Problem solving and multitasking skills**. I worked as a **developer (Analyst)** intern on a data migration project with a team of 15 individuals. My main job was to provide **production support, analyze the data** on different portals, perform testing, report bugs, **create tickets** using **Microsoft Azure DevOps and Power Platforms**. I have **project management/coordination experience** as I used to work back and forth with the clients to resolve the client portal issues. I also have good knowledge of MS office – **word, Outlook, Excel, and Power point** as I have used them various times for university to generate schedules, send emails, make class presentations etc. I developed my **organization and planning skills** while I worked with event organizing team in high school, our main work was to plan events in the school by scheduling programs and organizing decors and setting arrangement for those events.

I am excited to contribute my technical abilities and support towards your team to help your organization achieve its goals and learn new skills from the company. Please review my resume for a more in-depth illustration of work history and accomplishments. I would be pleased to meet with you for an interview to discuss the position and my qualifications further.

Thank you for your time and consideration,

Warm Regards,
Mansi Patel.
